The following risks have been identified as being significant and specific to the Issuer and of a nature, should they materialise, to have a significant negative impact on its business activity, its financial position and its access to various sources of financing:

- 1) the counterparty risk is the risk that a customer or counterparty will be unable or unwilling to meet a commitment that it has entered into with the Issuer;
- 2) the market risk is the risk that the Issuer's operating results, financial condition and prospects may be negatively affected by conditions in global financial markets;
- 3) the liquidity risk is the risk that the Issuer will encounter difficulty in realising assets or otherwise raising funds to meet commitments;

- 4) the operational risk and associated risks include fraud, compliance risks and information systems risk;
- 5) the non-compliance risk relates to the fact that the Issuer operates in a highly regulated environment that imposes costs and significant compliance requirements; changes in regulations may increase the cost and complexity of doing business;
- 6) In case of a major pandemic, such as the coronavirus disease of 2020, large-scale quarantines, travel restrictions, and social-distancing measures might eventually drive a sharp fall in the issuer's revenue and net profit, increasing its business risk. Furthermore, the self-reinforcing dynamics of a recession may kick in and prolong the slump in revenue of the Issuer on the longer term. Business investment contracts, and corporate bankruptcies soar, may put significant pressure on the solvency ratios of the Issuer and its credit quality; and
- 7) the implementation in France of the EU Bank Recovery and Resolution Directive could materially affect the rights of the Noteholders, the price or value of their investment in the Notes and/or the ability of the Issuer to satisfy its obligations under the Notes.
