You are about to purchase a product that is not simple and may be difficult to understand.

## WHAT IS THE PRODUCT ?

### TYPE

The Fund is a sub-fund of EdR Private Equity Select Access Fund II S.A., SICAV-RAIF, a *société anonyme* incorporated under the laws of Grand Duchy of Luxembourg as a *société d'investissement à capital variable – fonds d'investissement alternatif réservé*, established and existing under the laws of the Grand Duchy of Luxembourg, whose registered office is at 4, rue Robert Stumper, L-2557 Luxembourg, Grand Duchy of Luxembourg. The Fund qualifies as an alternative investment fund within the meaning of the Directive 2011/61/UE on alternative investment fund managers (the "AIFMD") as implemented in Luxembourg by the law of 12 July 2013 on alternative investment fund managers, as amended from time to time (the "AIFM Law"). Edmond de Rothschild Private Equity Luxembourg S.A. (the "AIFM") has been entrusted with the portfolio management and risk management of the Fund.

### OBJECTIVES

The Fund is a feeder fund of Edmond de Rothschild Equity Strategies IV, a french *société de libre partenariat* (the «Master Fund»). The investment objective of the Fund is to invest all of its assets in the Master Fund after deduction of fees and expenses. The main purpose of the Master Fund is to build a diversified and balanced investment portfolio. The Master Fund will adopt a collaborative approach to capital, by taking minority or majority positions in small and medium-sized enterprises whose value is within an indicative range of 50 million to 2 billion euros. The Master Fund will invest mainly in (i) equity securities, (ii) equity securities of companies or securities giving access to capital, (iii) shareholder loans, (iv) corporate bonds not admitted to the negotiation on a market of financial instrument or shares of limited liability companies incorporated under French law or of companies having an equivalent status in their country of residence and (v) any other instrument similar to a debt instrument carrying a capital risk.

The Master Fund may invest in a financial instrument market in opportunities compatible with development capital when it comes to (i) delisting opportunities, (ii) investments in companies which are technically listed (low float or zero) or (iii) investments in companies that can remain listed while being controlled by private equity shareholders in partnership with their management teams, and managed with a private equity type approach (long-term vision, practical approach or representation on the board ...). The Master Fund does not plan to invest more than 15% of its overall commitment in listed companies, it being understood that these listed companies will not include (i) portfolio companies which have been introduced on the stock market in order to become liquid and (ii) companies which are technically listed or whose free float represents less than 15% of their capital. The objective of the fund is sustainable investment within the meaning of article 6 of Regulation (EU) 2019/2088 known as the "Disclosure" or "SFDR" Regulation and is subject to a risk in terms of sustainability as defined in the risk profile of the prospectus.

### INTENDED RETAIL INVESTOR

The Fund is intended to be marketed to institutional, professional, and well-informed investors. Retail investors who would like to invest in the Fund must qualify as retail investors, pursuant to the Regulation (EU) No 1286/2014 of the European Parliament and of the Council of 26 November 2014 on key information documents for packaged retail and insurance-based investment products (PRIIPs), who have sufficient experience and theoretical knowledge of private equity funds, who are seeking exposure to a closed-ended investment which are able to bear the loss of their entire investment and who have a long-term investment horizon.

### TERM

The Fund is established for a period of ten (10) years from the date of the last day of subscription. This period may be extended by the Board of Directors of the Fund if extensions at the level of the Master Fund so require. The Board of Directors of the Fund may also terminate the life of the Fund early depending on the completion of divestments at the level of the Master Fund.

## WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

### Risk Indicator

The risk indicator assumes you keep the product for 10 years. You cannot cash in early. You may not be able to sell your product easily or you may have to sell at a price that significantly impacts on how much you get back

← Lower risk Higher risk →

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as 6 out of 7, which is the second highest risk class.

This rates the potential losses from future performance at a high level, and poor market conditions are very likely to impact the capacity of the Fund to pay you.

Changes to tax laws/treaties may adversely affect returns on your investment. This product does not include any protection from future market performance so you could lose some or all of your investment. If the Fund is not able to pay you what is owed, you could lose your entire investment.

### Performance Scenarios

Investment € 10,000

10 years (Recommended holding period)

Stressed scenario	What you might get back after costs	€ 2 291
	Average return <sup>1</sup> each year (%)	5,02%
Unfavorable scenario	What you might get back after costs	€ 3 815
	Average return <sup>1</sup> each year (%)	8,28%
Moderate scenario	What you might get back after costs	€ 6 620
	Average return <sup>1</sup> each year (%)	13,38%
Favorable scenario	What you might get back after costs	€ 8 725
	Average return <sup>1</sup> each year (%)	16,86%

This table shows the money you could get back over the next 10 years, under different scenarios, assuming that you invest EUR 10,000<sup>2</sup>. The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products. The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the investment/product.

The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you. This product cannot be cashed in. This means it is difficult to estimate how much you would get back if you cash in before maturity. You will either be unable to cash in early or you will have to pay high costs or make a large loss if you do so. The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

### WHAT HAPPENS IF THE FUND IS UNABLE TO PAY OUT?

Losses are not covered by an investor compensation or guarantee scheme. Furthermore, with respect to Edmond de Rothschild (Europe) S.A. as depositary of the Fund responsible for the safekeeping of the assets of the Fund (the "Depositary"), there is a potential default risk if the assets of the Fund held with the Depositary are lost. However, such default risk is limited due to the rules set out in Article 19 of the AIFM Law and in the Commission Delegated Regulation (EU) 231/2013, which require a segregation of assets between those of the Depositary and the Fund. The Depositary is liable to the Fund or to the investors of the Fund for the loss by the Depositary or one of its delegates of a financial instrument held in custody unless the Depositary is able to prove that the loss has arisen as a result of an external event beyond its reasonable control. For all other losses, the Depositary is liable in case of its negligent or intention failure to properly fulfil its obligations pursuant to the AIFM Law and any applicable rules and regulations.

### WHAT ARE THE COSTS ?

#### COSTS OVER TIME

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs.

The amounts shown here are the cumulative costs of (i) the product itself and (ii) the Master Fund. They exclude potential early exit penalties. The figures assume you invest EUR 10,000. The figures are estimates and may change in the future.

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

Investment € 10,000

If you cash in after 10 years

Total costs	-€ 4 060
Impact on return (RIY) per year	8,39%

<sup>1</sup> Net Internal Rate of Return ("Net IRR") for the investor. IRR is a method of calculating returns, used in Private Equity to compare investment profitability and corresponds to an annualized compounded return rate. The percentage return for the investor is determined based on the amount and timing of each contribution made to and each distribution received from the Fund. The term "Net" refers to the fact that the return is after costs.

<sup>2</sup> Your maximum commitment in the Fund, called over the life of the product, and you receive the proceed upon disposal of investments by the Fund over the life of the product.

## COMPOSITION OF COSTS

The table below shows the impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period and the meaning of the different cost categories.

		%	
<b>One-off costs</b>	Entry costs	0,00%	The impact of the costs you pay when entering an investment. This is the most you will pay, and you could pay less.
	Exit costs	0,00%	The impact of the costs of exiting your investment when it matures.
<b>Ongoing costs</b>	Portfolio transaction costs	0,34%	The impact of the costs of us buying and selling underlying investments for the product.
	Other ongoing costs	5,71%	The impact of the costs that we take each year for managing your investments and the costs previously presented.
<b>Incidental costs</b>	Performance fees	0,00%	The impact of performance fees. We take these from your investments if the product outperforms its benchmark.
	Carried interests	2,34%	The impact of incentive fees. We charge this amount when the performance of the investment is above 8% and below 10%. If the performance is above 10%, a payment of 80% of the differential between the final return and the threshold rate will be made to investors after the exit of the investment.

## HOW LONG SHOULD I HOLD IT AND CAN I TAKE MY MONEY OUT EARLY?

### REQUIRED MINIMUM HOLDING PERIOD: 10 years

The Fund is a closed-ended fund, meaning that shares may not be redeemed at the request of the investors prior to the liquidation of the Fund. The required minimum holding period, in principle, is 10 years starting on the Last Closing<sup>3</sup> date of the Fund as further described under the "Term" heading.

## HOW CAN I COMPLAIN?

If you want to file a complaint, please contact us via ordinary mail, email or fax.

## OTHER RELEVANT INFORMATION

The information contained in this KID is supplemented by the confidential placement memorandum and the articles of incorporation of the Fund, which will be provided to retail investors before subscription. Furthermore, the latest annual report and the latest NAV of the Fund as well as the information on the historical performance of the Fund will be provided to retail investors before subscription, if applicable, as provided for in Article 21 of the AIFM Law. Further information documentation may be obtained free of charge, in English from the PRIIP Manufacturer. A paper copy of the KID is available upon request and free of charge from the PRIIP manufacturer.

<sup>3</sup> As defined in the appendix f of the Fund's placement memorandum : the Last Closing, if there are subsequent closings, shall occur on/or about the final closing of the Master Fund, unless otherwise decided by the board of directors (the "Last Closing").
